Xtend – Product Range

Our product range extends
day by day.

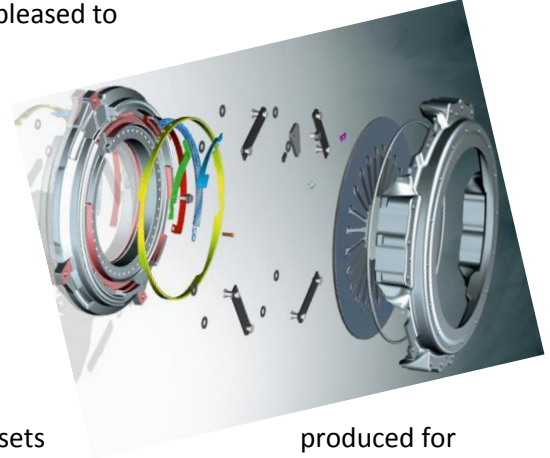

We are very proud to
announce that Xtend
clutches range product for
buses are ready.

We are offering original
equipment quality with
affordable price.

These kits are designed and
manufactured at our
factory under Dönmez
brand guarantee.

Hammer Kupplungen is very pleased to
introduce new family
members.

These new family members
replace Xtend clutch
systems which is fitted as
standard and original, details
can be found in following
tables;

Self-adjusting (XTend) clutch sets
produced for
Mercedes Benz, Neoplan, Setra and MAN vehicles provide a longer
lifetime in comparison to normal clutches and ensure consistent clutch
pedal force through the lifetime, providing ease of use.

As seen in the image these products work synchronized with the
adjustment mechanism and therefore the whole set must be changed in
case of replacement.
